

Worldwide Aircraft Disassembly & Recycling

www.aircrafterdemolition.com

“In less than six hours, Aircraft Demolition deconstructed an entire DC9 aircraft, hauling away all material, leaving the runway area free of debris and eliminating any possible FOD.”

Manager Aircraft Finance
Transactions & Administration,
Northwest Airlines, Inc. (now Delta Airlines)*

ON-TIME, ON-BUDGET MOBILE EXPERTS

Aircraft Demolition provides worldwide services including part-out, disassembly, demolition and recycling for commercial airlines, military, leasing and insurance companies. Aircraft Demolition’s capabilities allow you to avoid the excessive time and expense of aircraft refurbishment in order to transport your aircraft to a demolition site. Our team of aviation professionals will come to your site for 24/7 disassembly and recycling operations.

Our aircraft and jet engine recycling program generates revenue for our customers through our proprietary recycling methods. Aircraft Demolition is averaging a 90% recyclability rate on airframe recycling thus allowing us to generate more revenue for our customers. Choosing Aircraft Demolition to handle the disassembly and recycling of your aircraft is not only the most convenient choice, but is also the most cost effective and environmentally conscientious choice.

UNIQUE EXPERIENCE, PROFESSIONALISM AND ACCREDITATION

We are proud to be the first dual accredited organization by the Aircraft Fleet Recycling Association, with accreditations in both Disassembly of Aircraft, Powerplants and Other Aerospace Materials; and Recycling of Aerospace Materials. This means we deliver services at the highest levels of expertise and efficiency, guaranteeing that the job will be completed using the latest techniques, procedures and security protocols.

At Aircraft Demolition we are a team of aviation professionals that employ FAA licensed Airframe and Powerplant Technicians. Each technician averages over 20 years of experience in commercial and military aviation. Our team of technicians has the proven experience to disassemble all commercial and military aircraft anywhere in the world.

The Aircraft Fleet Recycling Association (AFRA) is recognized as the leading global industry association dedicated to pursuing and promoting environmental best practice, regulatory excellence and sustainable developments in aircraft disassembly, as well as the salvaging and recycling of aircraft parts and materials.

Aircraft Disassembly and Part-out

Custom-tailored solutions

Aircraft Demolition is an Aircraft Fleet Recycling Association (AFRA) accredited member in the Disassembly of Aircraft, Powerplants and Other Aerospace Materials. Our team of expert technicians disassemble the entire aircraft including the engines quickly and efficiently at your location or ours. Our focus is first on project safety and then to complete the aircraft disassembly on time and on budget.

Aircraft Demolition's FAA licensed team has the trained understanding of the environmental, safety and security aspects of aircraft dismantling around the world. Aircraft Demolition has earned a respected reputation for having rapid response availability, and knowledgeable technicians in all areas of Aircraft Disassembly.

Services include:

- 24/7 Worldwide coverage, with option to choose your location or ours
- Dedicated staffing with project manager through completion
- Daily inventory report of parts removed
- Parts tagged, recorded, packaged, crated and shipped
- Hull Recycling — Receive a credit towards disassembly
- RRT — Rapid Response Team available within 24hrs
- Full compliance with all FAA regulations, applicable laws and ordinances

BOEING 767 PRECISION DISASSEMBLY

Aircraft Demolition recently completed a precision disassembly of a Boeing 767, employing special cuts to remove the wings, vertical stabilizer, horizontal stabilizer, and reducing the fuselage into three separate sections. All pieces were transported for relocation to Boeing's Everett Plant to be used in testing and training. The procedure was completed in five days, half the time of the original ten day estimate.

Aircraft Demolition & Recycling

Maximize scrap yields

Aircraft Demolition purchases commercial and military aircraft for recycling purposes. Unique in the industry, we are an accredited member of the Aircraft Fleet Recycling Association in the Recycling of Aerospace Materials. Our highly skilled team of FAA licensed Airframe and Powerplant technicians put their average experience of 20 years to work for you. From start to finish demolition and recycling processes are completed on-time and on-budget:

- Our aging aircraft recycling program generates revenue for you
- Worldwide coverage, with option to choose your location or ours
- Eliminate costs in relocating aircraft including ferry permits, crew and fuel
- Stop expensive aircraft storage fees
- Over 50 aircraft successfully recycled, ranging from the Airbus A320 to the Boeing 747-400
- All alloys segregated using the advanced Delta Hand-Held XRF Analyzer
- Secure and environmentally safe work areas established
- Mutilation of materials guaranteed
- Salvaging of aircraft and parts for training aids and static displays
- Complete resources and equipment provided at every job location
- Full compliance with all FAA regulations, applicable laws and ordinances

SEGREGATE ALLOYS WITH PRECISION

Aircraft Demolition utilizes the highly advanced Delta Hand-Held XRF Analyzer, so our technicians can precisely determine the materials available for recycling. The Analyzer equips us with immediate metal identification capabilities which helps maximize the amount recycled material and minimizes waste and contamination.

Jet Engine Recycling

Expert technicians

Aircraft Demolition purchases and recycles jet engines at their secure Burnsville, MN facility. Types of jet engines recycled include manufacturers such as CFM, GE, Honeywell, IAE, Pratt & Whitney, Rolls Royce, and Garrett.

- Aircraft Demolition purchases jet engines for recycling
- Our turbine engine recycling program generates revenue for you
- All alloys (including precious metals) segregated using the advanced Delta Hand-Held XRF Analyzer
- Jet engines disassembled at our secure Burnsville, MN facility
- Mutilation of all parts is guaranteed
- All logistics handled by Aircraft Demolition
- Full compliance with all FAA regulations, applicable laws and ordinances

A PARTNER, NOT JUST A CONTRACTOR

Our most important job is to ensure your satisfaction. We collaborate with you to accomplish your goals and objectives in the most efficient, cost-effective and responsible way to maximize the benefit to your organization. Our many satisfied customers have experienced the value of this partnership and include:

- AAR, Inc.
- Boeing
- Delta Airlines
- Northwest Airlines
- VAS Aero Services
- Pacific Aviation Resources and Technology
- Alsalam Aircraft Company
- State of Minnesota

Contact us at 952-224-2424 today to discuss your needs and for a comprehensive proposal.

Obsolete Inventory Management

Stress-free inventory

Aircraft Demolition will provide complete obsolete parts management. Services include material identification, processing, logistics, full auditing, sale of scrap and revenue sharing.

Services include:

- Aircraft Demolition purchases obsolete inventory for recycling
- Our obsolete inventory recycling program generates revenue for you
- Full audit of materials received including weights
- All alloys (including precious metals) segregated using the advanced Delta Hand-Held XRF Analyzer
- Mutilation of inventory guaranteed
- Processed at our secure Burnsville, MN facility
- All logistics handled by Aircraft Demolition
- Full compliance with all FAA regulations, applicable laws and ordinances

TRULY CUSTOMIZED SERVICES

When we say we'll provide you with customized services based on your needs, we mean it. Aircraft Demolition handles aircraft disassembly and recycling exactly as you need. We will provide the expertise and staff needed to perform disassembly, recycling and disposal, or we will purchase aircraft and engines directly from you.

Aircraft Demolition is the most experienced team in the Aircraft Dismantling industry. Along with our vast aircraft maintenance experience, Aircraft Demolition's FAA licensed team has the trained understanding of the environmental and safety aspects of worldwide aircraft dismantling. Aircraft Demolition has earned a respected reputation for having rapid response availability, and knowledgeable technicians in all areas of aircraft disassembly. Aircraft Demolition is ready to assist when your aircraft has reached its end of life capabilities.
